

Floor Sealer

DOWN UNDER

FLOOR SEALER

The best way to prepare a floor for long lasting protection against wear, abrasion and chemicals is with a good sealer. This all-purpose sealer is ideal for use on resilient tile floors as a base seal coat. It is tough and not readily removed. A single coat, properly applied, will provide an excellent barrier and improve adhesion of floor finishes. It can prevent pitting, flaking and dusting of concrete surfaces, thus saving maintenance and repair costs. Can be stripped with finish dissolving strippers.

Do not use on flooring which will routinely get wet (i.e. around spas, hot tubs, etc...)

Features	-	Related Benefits
One-coat sealer	-	Fewer coats of finish
High solids	-	Penetrates and protects
Water-based	-	VOC compliant
Improves finish adhesion	-	Lower maintenance and repair costs
Tough protective film	-	Barrier between floor and finish
Difficult to remove	-	Resists chemicals and abrasion

Areas of Use -

Use with electric burnisher maintenance routines.

- Restaurants, hotels, motels, offices
- Hospitals, nursing homes, doctors offices
- Schools, universities, child care centers
- Grocery stores, malls, retail stores

To Use -

A single coat of this sealer with two (or more if desired) coats of finish will properly protect and enhance the appearance of most floors. **See label for complete directions and use only as directed.**

Specification Data

Available Sizes - 4/1G, 5G, 55G	Physical State - Liquid
Color - Milky White	Fragrance - Acrylic
Total solids - 14.5%	Metal Interlocked - Yes
Initial Gloss - Good	Traffic Area - Normal-High
Slip Resistance - Good	Burnisher Response - NA
Specific Gravity - 1.010	pH - 8.0
