

# Floor Finish

The latest floor care polymer technology is used in this combination sealer/polish to create a product that delivers wet-look gloss and outstanding durability. The unique polymer system provides ease of use and even application of polish onto resilient flooring or most non-resilient surfaces. This product is burnishable and is easy to remove with conventional stripper solutions.

This product is designed for use in heavy traffic areas, but will deliver unequalled results in any situation. The polish resists scuffs, abrasions, black heel marks and offers outstanding chemical resistance. It also provides very high slip resistance.

<b>Features</b>	<b>Related Benefits</b>
Latest polymer technology	- Outstanding gloss and durability
Seals as it shines	- Reduce labor
Designed for high traffic	- Unequaled gloss and scuff resistance
Unique polymer system	- Easy to apply, repair, and re-coat
High slip resistance	- Reduces liability potential
Use with any speed buffer or burnisher	- Excellent for any maintenance program
Removes with finish dissolving strippers	- Easy to remove

### Areas of Use -

May be used with propane maintenance routines in:

- Hospitals, nursing homes, doctors offices
- Schools, universities, child care centers
- Grocery stores, malls, retail stores

### To Use -

Apply finish in a uniform, thin coat to stripped floor. Three to five coats are recommended for initial application. **For applications, see label for complete directions and use only as directed.**

### Specification Data

Available Sizes - 4/1G, 5G, 55G	Physical State - Liquid
Color - White emulsion	Fragrance - Acrylic
Total solids - 21%	Metal Interlocked - Yes
Initial Gloss - Very High	Traffic Area - High
Slip Resistance - Exceeds ASTM 2047	Burnisher Response - Outstanding
Specific Gravity - 1.029	pH - 9.0
