## MALODOR COUNTERACTANT

Removal of unpleasant odors is simplified with this product. This deodorant does not merely cover up odors; it chemically neutralizes the odor causing molecules without leaving an overpowering scent. It contains fragrance plus a dual reodorizing system which reacts to eliminate odors. The unique formula continues to work to fight odors long after initial fragrance has dissipated.

It can be sprayed directly onto surfaces or fabrics without staining or leaving a residue. The versatile formulation allows its use in fire damaged facilities. Eliminates odors due to smoke, vomit, urine, fecal matter, pets and cooking.
