POWDERED HAND SOAP WITH LANOLIN

Borax

A special combination of borax, detergents, and skin conditioners are used in this powdered hand cleaner. It is designed to quickly remove heavy dirt, grease, soil, and grime without drying or irritating the skin. Formulated with lanolin for added mildness, this product is ideal for repeated use. This industrial strength hand cleaner produces rich lather, cleanses thoroughly, and is mild to skin. Unlike other powdered hand cleaners this one rinses freely and will not leave soap film or soil in sink basin.

Features	-	Related Benefits
Ready for use	-	Convenient
Industrial strength	-	Ideal for maintenance shops
Rich lather	-	Maximum cleaning
Contains lanolin	-	Moisturizes skin
Aggressive cleaner	-	Ideal for heavy, greasy soils
Fresh fragrance	-	Leaves hands fresh and clean
Contains borax	-	Attacks embedded soils and odors

Areas of Use -

- Press rooms, manufacturing plants
- Auto repair or maintenance shops
- Oil fields, petroleum plants
- Any area where hands get greasy and hard to clean

To Use -

Wet hands and sprinkle cleanser on palms. Rub hands together, working up a rich lather. Add more cleanser if necessary. Continue to lather until dirt is loosened. Rinse hands and dry. For exceptionally heavy dirt and grease, use less water and more cleanser to make a creamy paste. Rub well, adding small amounts of water, rinse and dry. **See label for complete directions and use only as directed.**

Specification Data

Available Sizes -	5#	Fragrance -	Floral
